

ESIS Appoints Ryan Ledger SVP of Strategic Outcomes and Data Analytics

ESIS, a Chubb company, is pleased to announce that Ryan Ledger has been appointed Senior Vice President of Strategic Outcomes and Data Analytics. In his new role, Mr. Ledger will be focused on identifying program recommendations that enable clients to better understand, anticipate, and manage risk using not just their program data, but also ESIS' established industry knowledge and expertise.

Leigh Anne Sherman, President, ESIS, said, "I am delighted to have Ryan join our team. His deep understanding of the power of data and how it can be leveraged to drive performance will be essential to enhancing and further developing ESIS' risk and claims management services."

"Data analytics technology is the best it has ever been and continues to get even better," noted Mr. Ledger. "If we utilize data as a strategic resource, we are better able to deliver recommendations that help our clients meet specific goals. I'm excited to collaborate with ESIS teams across the business and take our products and services to greater heights."

Mr. Ledger joins ESIS from Chubb, where he was most recently Vice President – Major Accounts. In that role, he crafted a platform modernization strategy for divisional data and underwriting systems. Mr. Ledger also served as Catastrophe Risk Manager for Chubb's workers compensation portfolio and is a member of the Global Employers Liability and Global Casualty Product Boards.

Mr. Ledger earned a Bachelor of Science degree with dual major in Actuarial Science and Accounting from Lebanon Valley College. He will be based in the Philadelphia, PA, office and will report to Leigh Anne Sherman.

Ryan's deep understanding of the power of data and how it can be leveraged to drive performance will be essential to enhancing and further developing ESIS' risk and claims management services
