

The Secret is Out...

Are you looking for a telerehab solution to speed recovery and RTW? ESIS' telerehab provides quality care, convenience, and easy access for injured workers.

Commitments at work or home, travel time, transportation, or scheduling challenges can limit an employee's willingness or ability to actively participate in the physical therapy necessary for their recovery.

ESIS' telerehab solution provides easy access to quality care. Benefits include:

- Licensed physical therapists specially trained in telerehab
- Ability to participate from the comfort of home or in designated areas at work
- Appointments available from 6am-10pm; same day appointments often available
- No special enrollment or set up necessary – sessions provided via a video enabled device such as a tablet, phone or laptop

The process is simple. An ESIS adjuster approves physical therapy and refers the employee to a PT partner who will offer the telerehab option to the employee and explain next steps.

Our telerehab solution can:

- Speed your injured workers' recovery
- Reduce overall PT sessions based on easier access and higher attendance
- Facilitate PT services to address musculoskeletal injuries, post-surgical rehabilitation and even chronic pain.
