

The Secret is Out...

Looking for a better telemedicine solution?

Telemedicine can begin with your internal clinicians providing initial triage.

Why does that matter? Because when your employee is injured, they want fast access to medical care they can trust.

Up to 40% of medical visits can be managed effectively using telemedicine.

Here's why our solution works:

- Improved recoveries through earlier treatment
- Option to partner with your existing clinical resources to initiate and guide the process
- Treating providers specialize in occupational medicine
- Reduced costs with fewer unnecessary emergency room visits
- Improved productivity with less time away from work
- Telerehab supports and speeds recovery
- Telemedicine participants rate their experience 4.5 out of 5

No medical resources on site? No problem!

Our telemedicine program also works in conjunction with ESIS NurseLine clinical resources to provide a custom solution. Whether you use our team or yours, we work together to improve claim outcomes and bottom line results.

Selecting and integrating the best medical solutions for our clients.
