

The Secret is Out...

ESIS ProClaimSM — Expert Healthcare Liability Claims Management
Professional healthcare liability claims require clinical professionals.

Why?

Complex allegations come with high demands supported by a wealth of medical documentation. You need expertise and diligence to effectively:

- **Explore the theory of liability**
- **Assess whether there was a breach of the standard of care**
- **Determine the relevance of supporting medical documentation**

Whether the claim stems from a hospital setting, a senior living center, an outpatient facility, or treatment by an individual practitioner — the evaluation of the claim demands answers to key questions:

- **Is there available coverage?**
- **Are there risk transfer opportunities?**
- **Was there a breach of the standard of care?**
- **Do medical records support the cause, scope, and permanency of injury?**
- **Are the diagnostics and treatment protocols consistent with the injury?**
- **Does the financial demand even make sense?**

Protecting your brand and your reputation is at the heart of each claim managed by our professionals. Claim strategies are thoroughly developed with a sense of urgency by our team of attorneys, clinicians, and specialty adjusters.

The material presented herein is not intended to provide legal or other expert advice as to any of the subjects mentioned, but rather is presented for general information only. You should consult knowledgeable legal counsel or other knowledgeable experts as to any legal or technical questions you may have.
